Advanced Information

Outdoor Classrooms A Handbook for Schools Gardens

by Carolyn Nuttal and Janet Millington

Outdoor Classrooms – A Handbook for School Gardens is ideal for teachers and home educators who want to incorporate outdoor education at all levels of the school curriculum, with an emphasis on:

- ✿ setting up edible gardens
- ✿ teaching children about growing food
- ✿ food security and economics
- ✿ human and planetary health
- ✿ permaculture and sustainability

Beautifully illustrated throughout, *Outdoor Classrooms - A Handbook for School Gardens* is presented as two streams of thought:

Carolyn takes us through the history of school gardens and articulates the need for a revival, before leading us on a enticing journey of the imagination into the schoolyard and delight in the natural world.

Janet then offers a comprehensive and practical plan for developing “a successful, supported school garden has the potential to benefit an entire community”.

“Outdoor Classrooms is a glimpse of a new way forward in teaching and learning. It is a book for its time.” Robyn Cook, author, parent and school garden volunteer.

ABOUT THE AUTHORS: Carolyn Nuttal and Janet Millington are experienced primary school teachers and permaculturists in Queensland, Australia. This is the culmination of many years teaching in and out of the classroom, of practical gardening experience and learning how best to integrate the outdoor classroom through all levels of curriculum.
